

Department: Pharmaceutical Sciences, OUHSC

Description: A Research Technician/Assistant position is open immediately in the lab of Drs. Anne Pereira and Anne Kasus-Jacobi, in the Department of Pharmaceutical Sciences, College of Pharmacy, OUHSC. Our lab focuses on the multiple roles of CAP37, an antimicrobial protein produced by neutrophils, in health and diseases. This position is to study the role of CAP37 in Alzheimer's Disease, using biochemistry and structural biology approaches.

Requirements: We are seeking a highly motivated individual who is familiar with protein work to optimize and conduct in vitro experiments. Previous experience with ELISA, bio-layer interferometry, mass spectrometry and enzymology is a plus. Experiments will be conducted at OUHSC and OU Norman campuses.

Minimum qualifications: BS Degree, or an Associate's degree plus 24 months research experience, or 48 months of equivalent experience in lieu of a Bachelor's degree.

Additional information: Please send an e-mail to anne-kasus-jacobi@ouhsc.edu to express interest and attach a CV/resume.
